</table>

$ - Internal copper thickness is limited to 119 microns for some materials

(NOTE 1) - Maximum external copper thickness of 102 microns (4.02 mils) plated up to 136 microns (5.35 mils).

* - CTI marking is optional and may be marked on the printed wiring board.

Marking: Company name or trademark $^{DCI}$, $^{AC}$, or file number and type designation. May be followed by a suffix to denote factory identification or burning test classification.

Last Updated on 2018-10-12

The appearance of a company's name or product in this database does not in itself assure that products so identified have been manufactured under UL's Follow-Up Service. Only those products bearing the UL Mark should be considered to be Certified and covered under UL's Follow-Up Service. Always look for the Mark on the product.
